# WE ARE YOUR CYBERSECURITY
PROGRAM PARTNER.

Because we are invested in helping you minimize cybersecurity threats, we...

- **Leverage our deep, diverse experience across industries**
  Our consultants have performed over 300 security projects for the public and private sectors, including the Intelligence Community and 8 of the 10 largest financial institutions in the world

- **Offer a full range of security and privacy services to help you expand your online presence**
  With new Government enabling technologies come increasing security requirements - we help you mitigate the risk associated with your digital growth

- **Utilize our own state-of-the-art methodology to simulate a real cyber-attack**
  Automated tools are useful but only a part of what we do - we carefully study how your systems and applications work to identify risks and vulnerabilities that cannot be detected by automated scanners, allowing us to apply real-world scenario experience that would be common in real attacks by cyber criminals

PTP Cybersecurity Solutions & Services

Enterprise Security Assessment — Security Roadmap — Roadmap Implementaion — Penetration Testing — Application Security Assessment — Network Security Assessment

SERVICE FEATURES

Web Application Penetration Testing
- WAPT Methodology

Staff Augmentation
- Planning
- Implementation

Incident Response

PTP HAS DEEP EXPERIENCE
IN THE INDUSTRIES THAT DRIVE THE GLOBAL ECONOMY

We understand that every organization in every industry has unique demands and opportunities, and we partner with you to offer customer experience solutions tailored to your needs.

PTP Industries

- Finance
- Government
- Healthcare
- Insurance
- Manufacturing
- Media
- Retail
- Technology
- Travel & Hospitality
- Utilities & Energy

Security Roadmaps

Security works best if treated as a program that is continually improved, and not only as a checkmark on a compliance report. We will analyze your current information-security states and compare them to practical starting points tailored to your business needs.

Next, we work with you to outline a sustainable information security program and identify the priorities that will pay the highest dividends for your organization.

Incident Response

IR is not a one-time event; rather, it is a continuous lifecycle that generates ongoing best practices. Most mature IR teams achieve greater success in detection and containment by using proactive continuous monitoring and response rather than reactive intermittent response processes.

PTP can help your organization craft an incident response plan and capability. Additionally, we can partner with your personnel to resolve incidents.

Compliance Assessment

Compliance assessments are all about "knowing what you don't know". An "outside" view is fundamental to avoiding conflicts of interest and oversight of key potential vulnerabilities. We work with you to help ensure your business processes designed to achieve your business objectives are secure.

Key elements include an Enterprise Security Assessment and protection from damage scenarios.

What our clients say

"PTP has consistently championed improvements to our way of business, adding significant value to our business processes and underlying technologies."
– Jim Martin,
CA Bureau of Real Estate Appraisers

"PTP's wider purview allows us to recognize opportunities and risks that our otherwise narrowed view would not allow."
– Blue Shield of California
Jessica Kaufman

"PTP has consistently shown us they are a leader rather than a follower. Since day one, PTP has helped us see new, innovative ways to do things."
– Darryl Young, California Lottery

"Your team always thinks like us and our customers, therefore we get things right. PTP also never forces solutions on us like other vendors."
– Large Technology Retail Provider
